For full product information, visit www.sti.com. Use the SpeedSPEC Code for quick access to the specific web page.

## Guard Lock Safety-Door Switch

- Holding force of $3,000 \mathrm{~N}$
- Two safety circuits and two monitor contacts provide an array of monitoring patterns.
- Standard gold-clad contacts enable use with ordinary loads and microloads.
- Models with trapped keys prevent workers from being locked in hazardous work areas.
- Models with rear release buttons allow people to unlock the Switch and escape if they are locked into hazardous areas.
- IP67 degree of protection

## Features

## Plastic Guard Lock Safety-door Switches Rank Among the Strongest in the World

A holding force of $3,000 \mathrm{~N}$ makes these Switches suitable for large, heavy doors.

## Models with Trapped Keys

OMRON Automation and Safety also offers Trapped Key Switches (on mechanical lock models only).

As long as a person has the trapped key when he enters a hazardous area, he does not have to worry about somebody locking the door and trapping him inside. The door can be opened only by supplying power to the solenoid and then turning the trapped key to unlock the D4JL.

There are thirty different types of trapped keys available for use in applications with adjacent hazardous areas.

## Two Safety Circuits and Two Monitor Contacts

The D4JL has two safety circuits. It also has two contacts to separately monitor the open/closed status of the door and the status of the lock.

## Models with Rear Release Buttons

A Switch with a rear release button allows the door to be unlocked from inside a hazardous area in an emergency. STI also offers Switches with Special Slide Keys. Refer to the D4NS-SK/D4JL-SK for details.

## Specifications

## Standards and EC Directives

## Conforms to the following EC Directives:

- Machinery Directive
- Low Voltage Directive
- EN 1088
- EN 60204-1
- GS-ET-19
- CCC

## Certified Standards

| Certification <br> body | Standard | File No. |
| :--- | :--- | :--- |
| TÜV Product <br> Service | EN 60947-5-1 <br> (certified direct opening) | Consult your <br> representative for <br> details. |
| UL *1 | UL 508, CSA C22.2 No.14 | 2005010305167533 |
| CQC (CCC) | GB14048.5 | $2005-196$ |
| KOSHA *2 | EN60947-5-1 |  |

*1.CSA C22.2 No. 14 was certified by UL.
*2. Only certain models have been certified.

## Certified Standard Ratings

TÜV (EN 60947-5-1)

| Item Utilization category | AC-15 | DC-13 |

| Current consumption | Approx. 1 mA | Approx. 8 mA |
| Color (LED) | Orange | Green |

Characteristics

| Degree of protection *1 |  | IP67 (EN60947-5-1) |
| :---: | :---: | :---: |
| Durability *2 | Mechanical | 1,000,000 operations min. (trapped key: 10,000 operations min., rear release button: 3,000 operations min.) |
|  | Electrical | 500,000 operations min. (3 A resistive load at 250 VAC) *3 |
| Operating speed |  | 0.05 to $0.5 \mathrm{~m} / \mathrm{s}$ |
| Operating frequency |  | 30 operations/minute max. |
| Direct opening force *4 |  | 60 N min. (EN60947-5-1) |
| Direct opening travel *4 |  | 15 mm min. (EN60947-5-1) |
| Holding force *5 |  | $3,000 \mathrm{Nmin}$. |
| Contact resistance |  | $25 \mathrm{~m} \Omega$ max. (per contact) |
| Minimum applicable load *6 |  | 1 mA resistive load at 5 VDC (N-level reference value) |
| Rated insulation voltage (Ui) |  | 300 V (EN60947-5-1) |
| Rated frequency |  | 50/60 Hz |
| Protection against electric shock |  | Class II (double insulation) |
| Pollution degree (operating environment) |  | 3 (EN60947-5-1) |
| Impulse <br> withstand <br> voltage <br> (EN60947-5-1) | Between terminals of same polarity | 2.5 kV |
|  | Between terminals of different polarity | 4 kV |
|  | Between other terminals and non-current carrying metallic parts. | 6 kV |
| Insulation resistance |  | $100 \mathrm{M} \Omega$ min. (at 500 VDC$)$ |
| Contact gap |  | $2 \times 2 \mathrm{~mm}$ min. |
| Vibration resistance | Malfunction | 10 to $55 \mathrm{~Hz}, 0.75 \mathrm{~mm}$ single amplitude |
| Shock resistance | Destruction | $1,000 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. |
|  | Malfunction | $80 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. |
| Conditional short-circuit current |  | 100 A (EN60947-5-1) *7 |
| Conventional free air thermal current (lth) |  | 10 A (between terminals 12 and 41), 3 A (between all other terminals) (EN60947-5-1) |
| Ambient operating temperature |  | -10 to $+55^{\circ} \mathrm{C}$ (with no icing) |
| Ambient operating humidity |  | 95\% max. |
| Weight |  | Approx. 650 g (D4JL-4NFA-C7-01) |

Notes: The above values are initial values.
*1. The degree of protection is tested using the method specified by the standard (EN60947-5-1). Confirm that sealing properties are sufficient for the operating conditions and environment beforehand. Although the switch box is protected from dust or water penetration, do not use the D4JL in places where foreign material may enter through the key hole on the head, otherwise Switch damage or malfunctioning may occur.
*2. The durability is for an ambient temperature of 5 to $35^{\circ} \mathrm{C}$ and an ambient humidity of $40 \%$ to $70 \%$. For further conditions, consult your sales representative.
*3. Do not pass a 3 A, 250 VAC load through more than two circuits. *4. These figures are minimum requirements for safe operation. *5. This figure is based on the GS-ET-19 evaluation method. *6. This value will vary with the switching frequency, environment, and reliability level. Confirm that correct operation is possible with the actual load beforehand.
*7. Use a 10 A fuse type gl or gG that conforms to IEC 60269 as a shortcircuit protection device.

## Connections

Contact Forms
Indicates conditions where the Key is inserted and the lock is applied. Terminals 42-11 and terminals 52-21 are connected internally (as per BIA GS-ET-19).

| Model | Contact (door open/closed detection and lock monitor) | Contact form | Operating pattern |  |  | Remarks |

## Application Examples

G9SA-321-T $\square$ (24 VAC/VDC) + D4JL- $\square \square \square$ A- $\square \square$ (Mechanical Lock Models)/Manual Reset

2. When the release button is pressed on rear release models, the solenoid contacts are turned OFF.
3. With Trapped Key Models, the door will not lock when it is closed with the trapped key removed.

## Notes:

A 24 VDC solenoid lock cannot be combined with a trapped key. A 24 VDC solenoid lock cannot be combined with a special release key and rear release button.
*1. Release keys are provided.
*2. Thirty types of trapped keys can be manufactured. Specify the trapped key type in numerical order starting from 01 when ordering.
